

# DIY Paper Holiday Wreath

- The shape below is 1/4 of your wreath base. Print four copies on cardstock or trace onto thick paper or cardboard.
- Tape the 4 quarters of your wreath together. This doesn't have to be pretty. It'll get covered up in the next steps.
- Use the template on page two to cut out 120 strips of the gift wrap of your choice. We promise, it'll be worth it!
- Make your paper strips into teardrop-shaped loops and glue together at the ends.
- Start assembling your wreath! Glue down your loops in lines of three, very slightly fanning out to give wreath a fuller look.
- Keep adding loops to the wreath base. You should use about 30 loops per quarter of your wreath (aka, 10 rows of 3 per quarter).
- Once you've finished, admire your handiwork, and hang it up for all to see!
